

TAMARACK

Tamarack, located in Beckley, West Virginia, is an educational and retail showcase of West Virginia culture and crafts. Displays and presentations are facilitated by galleries, studios, and a 200 seat theatre. Retail spaces also promote West Virginia foods and products. Demonstration areas allow artisans to exhibit their unique skills.

CFA provided design expertise toward room acoustics, sound reinforcement and audio distribution systems. The audio distribution included indoor and outdoor venues. Design work for the theatre included projection systems for transparencies, 16mm film, and video. A video distribution system was also designed for various spaces in the facility.
