

ST. MARK THE EVANGELIST CATHOLIC CHURCH

St. Mark the Evangelist Catholic Church is a facility serving the east suburbs of Birmingham, Alabama. The facility includes a 1000-seat Sanctuary and a 200-seat Chapel.

CFA's services included the design and commissioning of a sound reinforcement system for the sanctuary. Loudspeakers are concealed behind fabric panels to provide proper sound distribution while not interrupting the aesthetic look desired in the space.

The sound system includes audio sources at the altar and rear choir area to provide directional realism from these two locations of the sanctuary. Automatic microphone mixing provides natural reinforcement of speech and music without the requirement for a dedicated sound system operator. A manual mixing console located in the rear choir area provides added flexibility when more complex set ups are required.

Client: Krumdieck A+I Design, Inc.; Birmingham, AL

Facilities: Sanctuary

Designer: Jill C. Elmers

Completed: 2003
