

ERCOT AUSTIN CONTROL CENTER

The Electric Reliability Council of Texas, Inc. (ERCOT) is the corporation that administers the state's power grid. ERCOT serves approximately 85 percent of the state's electric load and oversees the operation of approximately 70,000 megawatts of generation and over 37,000 miles of transmission lines.

ERCOT's Austin facility includes a Network Operations Center served by a 32-foot wide by 12-foot high video display wall, as well as a multipurpose Boardroom/Classroom space served by three large format front screen video projection systems.

The Boardroom/Classroom space pictured above provides one large space for ERCOT's monthly board meeting as well as multiple training environments for ERCOT staff.

CFA's services for this project included acoustical consultation, and detailed design and commissioning of the audio-visual presentation and video display systems.

Client: Electric Reliability Council of Texas, Inc.; Austin, TX

Facilities: Conference & Boardrooms

Designer: Robert G. Ledo

Completed: 2002
