

# BRYANLGH CONFERENCE CENTER

The Conference Center located on the west campus for BryanLGH Medical Center, in Lincoln, Nebraska, is a full-service multimedia meeting facility. Featuring over 3,000 square feet of meeting space, the main conference center rooms can be divided into three separate spaces through the use of operable partitions, enabling each space to act independently with respect to audio-visual (AV) functions.

The conference room spaces utilize a custom AV control system, and wireless touch panels that enable the user to assemble the rooms in a variety of configurations, in which AV sources from any of the three rooms can be displayed in any one, or all rooms as arranged.

In addition to the conference rooms, the facility offers six classrooms with individual AV sources, as well as AV feeds from the conference rooms enabling them to act as overflow spaces when needed.
