

THE CAPERTON CENTER

The Caperton Center is a new conference facility at Tamarack, the Best of West Virginia, in Beckley, West Virginia. This facility includes a conference area which can be broken down into one, two, or three conference rooms with spacious pre-function and lobby areas, a boardroom for smaller meetings, and terrace and lawn areas for outdoor activities.

CFA's services for this project included acoustical consultation, programming and detailed design of audio-visual and sound reinforcement systems, and final testing and commissioning of the installed systems.

The Conference Center sound reinforcement and audio-visual systems combine and separate to match the operable partition locations. The pre-function, lobby, terrace, and dining areas can receive audio from any of the conference rooms or a separate CD source.
