ROBERT G. LEDO, Senior Vice President of Coffeen Fricke & Associates, Inc., is actively involved in the design, testing, and commissioning of audio-visual and sound reinforcement systems for all types of facilities throughout the United States and in Germany, Japan, and Korea. Bob has over 20 years of project management, technical supervision, and hands-on field experience.

In his role as Senior Vice President, Bob is an advocate for continual client contact. From the initial marketing effort, through the entire design and construction process, and continuing with post project follow-up, Bob's goal is to make sure that the client's needs and expectations are always being served.

Prior to joining the firm, Bob served as the technical supervisor of sound reinforcement and audio-visual system installations for a Tulsa, Oklahoma, systems contractor. Bob's past experience also includes freelance work in show lighting, audio-for-video productions, and television productions.

Bob received a Bachelor of Science degree in Telecommunications and Business Administration from Oral Roberts University in 1981.
